Some countries have completely banned genetically engineered foods eg. Norway. Most of Europe is totally opposed to these foods. 15,000 French farmers also pulled up their fields as a public protest. In England as well women also pulled up whole fields of Monsanto's plants. We in the US are way behind this forward thinking. Congress has an opportunity to do something until April 3rd. There should be a moratorium on GE foods until long-term studies show they are safe for human health. Thank you Carmen Spring P.O. Box 2246 Winston OR
